

TWISTOR NEWSLETTER No. 30

Light rays near i° : A new mass-positivity theorem.	
R. Penrose	1
A quasi-local construction with positive mass.	
A. Dougan & L.J. Mason	6
Monopoles and Yang-Baxter equations.	
M.F. Atiyah & M.K. Murray	10
H -space — a universal integrable system?	
L.J. Mason	14
Some quaternionically equivalent Einstein metrics.	
A. Swann	18
A non-Hausdorff mini-twistor space.	
K.P. Tod	21
More on harmonic morphisms.	
K.P. Tod	24
An algorithm for the Penrose transform.	
R. Baston	26
The Penrose transform without spectral sequences.	
R. Baston	27
Cohomological contours and cobord maps.	
S. Huggett & M.A. Singer	29
Some new boundary-contour integrals.	
A.P. Hodges	33
Some Yukawa interaction diagrams.	
L. O'Donald & A.P. Hodges	36
Extended Regge trajectories: 12 years after.	
R. Penrose & Tsou S.T.	38

Contributions for TN 31 should be sent to

Klaus Pulverer,
Editor, Twistor Newsletter,
Mathematical Institute,
24-29 St. Giles,
Oxford OX1 3LB, England.

to arrive before 1st October 1990.
